

32Gbps EVN videocon, 4/6/2019, 13.30 CEST

present:

JIVE: Bob, Harro, Mark, Arpad

videocon: Michael, Jun, Simon, Uwe, Walter, Ed

excuses from Sven

Agenda:

status/availability of telescopes  
status/availability of hardware  
status/availability of firmware  
possible test dates (summer holidays)  
aob

Firmware: no new version yet, maybe in two weeks (email from Sven)

Hardware: DBBC3 of Yebes still at Bonn, still not fixed. Maybe in two weeks.

Availability of telescopes and possible observing dates:

Effelsberg: out in summer during daytime for maintenance, available after e-session on 19/6, and on 2/7 and 4/7

Onsala (after checking with Rudiger): available on those dates

Yebes: available as well

Tianma (email exchange after videocon): available 19/6, not on 2/7 and 4/7 due to maintenance

AOB: Ed plans DBBC3 support in FS by late summer.

Action plan:

IF new firmware arrives before the 19th of June we will observe with Ef, On and T6, and Ys either with DBBC3 or DBBC2

Videocon on Monday the 17th of June at 13.30 CEST

If no new firmware, Uwe wants to do a wastro mode test. To be discussed at the telecon.

Last observation before the summer vacations: 4th of July, Ef, On and Ys.

Videocon on Wednesday the 3rd of July, 13.30.
