

32 Gbps EVN videocon, February 25, 2-10, 13.30

present: Michael, Roger, Simon, Jun, Walter, Uwe, Helge, Sven, Harro, Bob, Arpad, Javier, Rongbing

Agenda:

Actions

State of Python scripts to program DBBC3/DDC 8 BBCs  
access to GEO flexbuffs from JIVE

Any missing bits?

Next observation: March 14?

AOB

Python scripts: have not been checked yet, Jun will do so this afternoon, Javier has already done this and found no issues

Harro: what input does Helge's code expect? Helge: these are utilities to help with the configuration, run before observation, validate config

Schedule: Bob has created something, not quite sure if he understood email of Rudiger correctly. Stations to give it a go this afternoon as well

access to flexbuffs: has been verified by Harro et al, no problems.

action Harro: open mattermost channel for test tomorrow.

March 14: maybe Tianma and Effelsberg will be available (Rongbing has since confirmed that Tianma is available). Let's stay well away from VGOS sessions.

Videocon on March 13.30
