ESCAPE update meeting, 12 Feb 2020, Harro's office
Present: Ilse, Mark, eBob, Des, Huib

Agenda:

- quickly go over the "Des document" (shared google doc, our main guideline)
 https://docs.google.com/document/d/
12xPMuazoVC-8umPOeYuj2P7r4TgjlWHS7vYwU6HOslc/edit?ts=5caf1728

    WP3   is progressing (it is work that we were already doing)
    WP4,5   very little to no progress (lack of hiring, travel)

- upcoming ESCAPE progress meeting Brussels

    Paco, Aard, Mark, Harro will attend.
    Harro disseminated our progress to various WP leads.
    Expect participants to mingle and discuss with partners about
    e.g. WP3 repository implementation and WP4 VO

- WP4 progress
- (re)structuring archive(s) to accomodate statistics and Virtual Observatory needs.
 We'll use Huib's memo (attched) as starting point.

    Priorities:
    - start design/bring up new, parallel, database for
        * VO meta data, serve as seed for DACHS VO server
        * administration of data flow in JIVE to address UseStatistics
          mentioned in Huib's document

    - bring up local DACHS VO server so we can start to use
     VO tools locally

    - Huib to add pilot project to link published articles to EVN data experiments
     in the shared Des document. Huib, Katharina and Zsolt have separate
     tooling for doing this; Des will start to collect these and come up with a
     single replacement tool which should be able to help automate this as
     much as possible
