

Network Monitoring Report: C-band N17C1

Source: J0319+4130 and J0237+2848
Reference antenna: Effelsberg
Experiment code: N17C1

Length: 180 min.
Date of observations: 28/02/2017
Date of report: 13/07/2017
Observing mode: Mk V, mode 512-18-2, dual pol.
Reference date: 28/02/2017; 59d 13h 00m
by: Jay Blanchard

- ⊗ According to expectation, no special remarks
- Problem occurred - see enclosed footnote(s)
- ⊠ Station did not observe (not scheduled)
- Entry not applicable/investigated

Enclosure: Footnotes C-band N17C1

Footnotes to the Network Monitoring Report: C-band N17C1

General:

- a) **Ef, Effelsberg:** Like several telescopes Ef has a dip in the RCP subband 7.
- b) **Mc, Medicina:** Like several telescopes Mc has a dip in the RCP subband 7.
- c) **Mc, Medicina:** Medicina provided no logs for this experiment.
- d) **Nt, Noto:** Noto had an error in Mk5/dbbc settings resulting in no fringes/recording.
- e) **T6, Tianma:** No antab provided, and no feedback on the web at all.
- f) **Ys, Yebe:** Had a maser problem resulting in Ys using a spare maser.
- g) **Ys, Yebe:** Like several telescopes Ys has a dip in the RCP subband 7.
- h) **Jb, Jodrell Bank:** No feedback or antab provided.
- i) **Wb, Westerbork:** Had swapped pols at start but fixed halfway through the experiment.
- j) **Tr, Torun:** No feedback provided.
- k) **Nk, NKuntunse:** First fringes ! Used a rubidium hence the high rate.
