Footnotes to the Network Monitoring Report: X-band N22X1

General:

The stations *Effelsberg* (Ef), *Tianna* (T6), *Toruń* (Tr), and *Yebe* (Ys) had an issue when loading the setup from the pre-files. While the DBBC2 was set up for 2-Gbps mode, the recorder was to 4-Gbps one. Unclear origin of the issue as no problems were reported in the past on multi (2/4-Gbps) setup schedules.

- a) **Wb, Westerbork:** Data show slight drops in amplitude and phase along the time.
- b) **Nt, Noto:** RCP signal was recorded to both RCP and LCP channels due to missing station setup procedure. Fixed after scan 32.
- c) **Tr, Toruń:** Faulty receiver.
- d) **Ys, Yebe:** Communication issues with the flex buff. Solved for scan 3.
- e) **Ir, Irbene:** Broken maser.
- f) **Km, Kunming:** Az-bearing issues.
