

XXIII International Conference on Radio Telescopes and Radio Interferometers (RR2020)

18th of September, 2020

Armenia-Nederland-Germany-Spain-Sweden-Australia-United Kingdom

Zoom meeting- videoconference

Keeping good traditions

- Each year from 1968 till 1990 the All-union Conference on Radio Telescopes and Radio Interferometers held in Yerevan, Armenia (that time a part of the USSR).
- There were a series of the All-union Conferences on Antenna Measurements (BKAI) also organized by Herounis Institute for long time.
- After 30 years of the gap in the scientific activities field in our country, we try to revive the scientific heritage of Professor Paris Herouni in Armenia.

**18th of September is
The Astronomy Day in Armenia
Since 2009**

Birthday of **Viktor Hambardzumyan**

WELCOME

Engineering and Scientific aspects of the revitalizing and modernization of the ROT-54/2.6 Radio Telescope
