

Agenda: M2O telecom, No. 6

April 3, 2019
minutes: Ross Burns

The G358 event expanded M2O activities, especially those involving new members. Many thanks to those who have joined us. Welcome!

1 Recent maser activity (Non-G358)

- Orion KL, NGC 2071, RhoOphiu, G25, W49N, [IRAS16293-2422](#), others?

2 G358: Observation reports

- Single dish [PDF](#), [MacCleod](#)
- JVLA [PDF](#), [Bayandina](#)
- SMA
- VLBI [PDF](#), [Burns](#)
- Others
- How best to record and share results (considering sensitive data)

3 G358: Interpretation of results so far

Open discussion

4 G358: How to proceed

- More proposals? (more epochs) [followup KVN monitoring (KeeTae)]
- More proposals (other instruments)
- How to group observational efforts (star formation, chemistry, a balance of both)
- An M2O meeting (Y/N, if Yes: Where? when? what topics?)
- Slack and the new website

5 Other business

- Visits / collaborations
- Interesting meetings in 2019
- Other announcements
