SCHED meeting, 9-5-2017, 11.00

present: Des, eBob, Mark, Arpad

- Des: where to store? Git? Right now sched is in SVN. According to Mark, should be possible to close SVN tree to git, update. Will find out **action Mark. Should we have our own git? Talk to Paul **action Arpad

- Arpad: write up responses of forum members **action Arpad

- Mark and Des seem to agree on building a layer that shares data structures. Direct mapping seems to be out of the question. Some discussion on using C for data structures, swiggifying to Python. Mark will write up possible ways, Des has an example that can be added. **action Des and Mark. eBob will look into swiggifying. **action eBob.

- Des will print out work flow (done)

- all: read up, check code a bit more, meet again next week Tuesday
