present Harro, Des, Benito, Jon, Arpad

Des: working on folding disk based and e-version together

Benito: has data to look at, 4 stations. May be a problem when stations is missing, but re-appears in later scan. Des will look at it.

Harro: need to work on in-house testing, needs eBob. Discussion about spacing packets, needs to know packet length, available bw, how many stations per flexbuff. Des will think of how to set this up, info is there

Jon: making simulation files, 1000B packets, 0-7 stations. Today, more likely next week simulation results
