JUC(let), 22-01-2016, 11.00, Arpad's room

present Jonathan, Harro, Des, Arpad

Des: compared cross correlations produced with old and new versions of control code, identical. Done.

Jonathan: output of filterbank, input to FFT, scaling differed by 4 bits between 16 and 32MHz versions. Fixed most of it, although it is very hard to compare plots, as the numbers of the axes fall off the paper. Also, cross correlation seems to have strange pattern.

Des: talked to eBob about last bits of integration of control system into operational control system, should be easy (...)
