JUC, 25-11-2016, 11.00, Arpad's room

present Harro, Jonathan, Des, Benito, Arpad

Des: new data set, no packet loss, and subbands align properly

Harro: phase difference, constant over time, linear over frequency
Have to re-run SFXC, used different vexfile, different clocks. Comparing
apples and pears in short. Today.

Jonathan: put in registers, timing got a bit worse, fixed that in simulation.
Worked on output of UDP packets, caught one, was mangled though,
running simulations
