

JUC, Friday 11-12-2015, 11.00, Arpad's room

present: Jonathan, Des, Arpad

Des: making progress on to-do list, end of year still seems reasonable. Some discussion on 16/32MHz mix, Jonathan thinks it is mainly a matter of book-keeping, which means more work for Des.

Sanity check on all outputs: this is still in the hands of Harro, general solution is not possible, but it needs to be done.

32MHz needs testing, as does 16MHz.

Jonathan: was on the review of the HEM. One problem was found with the links between HMCs which cannot be arbitrary. Caught in time. Some problems with UB2: Quartus and new chips. A new Q15.1 will be installed
