

JUC, 12/2/2016, 11.00, Arpad's room

present Jonathan, Harro, Des, Arpad

Des: 1 thing, asked eBob to insert support for UB in his code. Next week try operator operations

Jon: fixed 2 related bugs. 16 MHz: 2 interleaved bands, which is not the case for 32MHz. Looks much better, but found another bug, wrong # bits in fractional delay. New test will be done, better data set this time.

Arpad: 32MHz data set should be available, 1 expt. Need to talk to dr. Bob
