

JUC, 19-02-2016, 11.00, Arpad's room

present: Jonathan, Des, Arpad

Des: about to run NME downstairs. Jonathan has been running jobs, single click, setups all work

Jonathan: mostly UB2. DDR tests, first nothing at all, then, wrong resistor again (like in proto....) Most modules ok, some not, after cleaning contacts all were fine. Eric managed to insert bug in triple speed ethernet, fixed. Transceivers ok. UNB test version needed for DDR as well, Leon is working on it.

JUC: progress, data look much more like known good. Check an integration, check against SFXC
