

WURM, 22-01-2018, 14.00

present Mark, Wybren, Paul, eBob, Aard, Des, Arpad

Mark: was in Nice. Cristina will be visiting. Should start on CASA issues, also Cleopatra

Wybren: installing all new nodes, try to use Ansible. One node with Zabbix, testing. Few machines seem to boot up by themselves after power outage, look at that. NRAO site: no time stamps, all works. Still unclear where the problem lies

Paul: Jb 3G: mail from GEANT, things do not move terribly fast. Got a quote for 2 flexbuffs, no news from Mellanox, will get last parts of Fibrestore this week. There has been a power outage last week, everything came up again. Need to give a talk at the SKA roadmap meeting.

eBob: working on last plottype for SCHED, then tackle build system

Aard: finally managed to make singularity image, needs to be done by them, times out after 2 hours. Talked to student of Mike, who works on mult phase centers. Did some weird stuff that caused much fewer detections, fixed. Mail from Irbene about beam maps. Got a machine for Jupyter CASA server, talk to Tammo Jan

Des: need to get fringe fitter to NRAO, pretty much ready, then will hear what they want more. Successful JUC e-test. Work on Nijmegen wishlist.
