

## RO SDOS

Related to JIVE

*Jasper Annyas*

*April 11<sup>th</sup> 2018*

- Support combined with development
- Networking
- Tools used
- Software development process

No corresponding group in JIVE, so I am curious at the software development process:

1. Requirements management (Backlog, PO)
2. Development process: code review, standards, documentation
3. Release management; process, schedule
4. QA: Testing, environments

1. Efficient development
2. Contribute to make LOFAR a widely used successful instrument
3. Be part of building LOFAR 2
4. Effective support WSRT, in respect to end time
